INTRODUCTION

Purpose of Plan

The Travel Advisor Web Application plan will provide a definition of the project, including the project's goals and objectives. Additionally the plan will serve as an agreement between the following parties: Project Manager, Product Owner, Project Team, and other personnel associated with and/or affected by the project.

The Project Plan defines the following:

- Project purpose.
- Business and project goals and objectives.
- Scope and expectations.
- Roles and responsibilities.
- Assumptions and constraints.
- Project management approach.
- Project budget.

Goals and objectives

Business Goals and Objectives

Our business strategy will revolve around the need to provide quality service to our target customers, in the process fully satisfying their needs. This shall be undertaken through choose a professional team to work on Travel Advisor Web App (TAWA), ensure the product quality, and provide our customers with their favorite places based on their reviews to gain customers loyalty in addition to their trust.

Project Goals and Objectives

TAWA is a web application dedicated for anyone who likes to travel, and/or discovering new and different places.

The project goals and objectives are:

- Finish the project before a week from it's specified deadline time to apply the buffering process.
- Have a well-documented, managed and organized work products of the project to reuse them in other projects.
- Apply a well defined process to apply it in other projects.
- Increase the knowledge of the team members in this business domain.

Scope

Scope Definition

This project will consist of creating a web application with the main functionalities that help users and guest to choose their targeted countries and flights, and a rating system so users can send their feedback and share their experience.

Delivery team	<ul style="list-style-type: none">▪ Presents working software to customer community.	Mayson Magdy, Asmaa Hamdy, Sara Sayed, Mahmoud Yasser, Esraa Salah

PLAN APPROACH

Agile MINDSET is applied to the project due to rapid change and fixed time constraints, SCRUM METHODOLOGY HAS BEEN USED.

The project consists of five sprints, the duration of each sprint is one week.

Each sprint ends with a set of work products.

A daily stand up meeting is done to discuss the team progress, the issues faced the team and the work to be done.

Change Requests

Change Requests

In case of the customer wants to add or update new feature/s to the system, there will be an analysis process to determine the priority of the new feature, then the team will de-scope the feature/s which have the lowest priority to maintain their efforts and milestone dates.

Change Request Template

CHANGE REQUEST TEMPLATE	
Project Details:	
Project Name: <i>Enter the Project Name and reference ID.</i>	
Request #: <i>Unique identifier for this change.</i>	Date of Request: <i>Enter date of this change request.</i>
Requested By: <i>Person requesting the change</i>	
Request Description: <i>Describe the change being requested. Be as specific as possible. If appropriate include technical details, diagrams, and a 'before and after' description. Include the reference IDs of impacted Product Descriptions.</i>	
Reasons for this Change Request: <i>Describe the reasons and purpose of this request (what is the business or technical driver). Explain the impact of the change request on the Business Case. For example the change may be required to manage a risk that if realized could prevent the project realizing a key business benefit.</i>
